Technical Skills

Proficient With

- Unreal Blueprinting
- Systems Design
- Gameplay Design
- Game Prototyping
- Level Design
- Agile & Scrum Methodology

Familiar With

- 3D Modeling & Texturing
- Game Art Principles
- C#
- C++
- CSS / HTML
- Javascript

Software

- Unreal Engine
- Perforce
- Unity
- Adobe Photoshop
- Adobe Illustrator
- Substance Painter & Designer

Other Skills

- Communication
- Problem Solving
- Attentive to Detail
- Improvisation

Hobbies

- Linux Desktop Usage
- Playtesting and Feedback

Education

Savannah College of Art and Design | May 2026

B.F.A. in Interactive Design and Game Development
Minor in Creative Writing

Cumulative GPA: 3.82 | **Major Specific GPA:** 4.0
Honors: Magna Cum Laude, Eight-Time Dean's List

Experience and Projects

Garden of Idan | System Design Lead

January 2026 - May 2026

- Architected and implemented all core game systems.
- Managed and maintained Perforce revision control for a team of eight people over 20 weeks.
- Resolved complex technical hurdles, including camera occlusion for an isometric camera in Unreal Engine.
- Created easy and fast ways to modify and implement key systems by Gameplay Designers.

Cold Fusion | Solo Project

March 2025 - May 2025

- Designed key systems to be modular and versatile, with future development alongside other systems designers in mind.
- Challenged myself to develop gameplay that would require unique solutions in Unreal Engine.
- Optimized game performance using a dynamic object pooling system for enemies and bullets.

Overgrown! | System Design & UI Implementation

Fall 2024 - Winter 2025

- Worked with a large scale production team for a year-long project in Unreal Engine.
- Designed and documented systems for perpetuity and future use by other Gameplay and Systems Designers.
- Worked with graduate students and under the direction of more experienced systems designers.
- Worked in an Agile method environment, meeting bi-weekly sprint goals and user stories.
